

AFCS Smart Campus

School Management Operating System — Simplified Pitch
Version 2.0 — July 2026

Air Force Comprehensive School, Igbara-Oke, Ondo State, Nigeria

What Is AFCS Smart Campus?

A complete digital operating system for running a secondary school. Think of it as the operating system that connects every part of school life — attendance, duties, timetables, communications, and reporting — into one seamless platform.

80+

Staff Using It Daily

3,000+

Students Tracked

12

Core Modules Live

Live

In Production Since Early 2026

The Problem It Solves

Nigerian schools today run on paper, WhatsApp groups, and manual processes. This creates real problems:

- **Attendance is paper-based** — 500+ records daily, easily lost, impossible to audit
- **Timetables take 3-5 days** of manual work and often have clashes
- **Duty assignments are confusing** — staff don't know their duties, no one tracks completion
- **Communications are scattered** — WhatsApp groups, notice boards, word of mouth
- **No real-time visibility** — school leaders can't see who's present, who's on duty, or what's pending
- **No accountability** — tasks assigned informally, no audit trail

In short: Running a Nigerian secondary school is like flying a plane with no instruments. AFCS Smart Campus provides the cockpit.

The Solution — 12 Integrated Modules

1. Smart Attendance

QR code + manual check-in/out for staff and students. Late detection, class breakdowns, real-time dashboard.

2. Duty Roster Engine

8 duty types (Morning Talk, Assembly, Sanitary, etc.). Auto-rotation so assignments are fair and nobody is forgotten.

3. AI Timetable Generator

Creates conflict-free timetables in seconds. No more 3-day manual scheduling marathons.

4. Muster Parade

Digital parade sessions, briefings, task assignment with acknowledgement. Everything tracked.

5. Prefect Roles

18 prefect roles assignable to students. Badges, filters, leadership tracking.

6. Daily Reports

Structured reports with AI summaries. Know what happened, what's challenging, and what's next.

7. Telegram Bot

25+ commands. Staff check duties, tasks, timetables from their phone. Zero cost to run.

8. Multi-Channel Comms

Telegram + WhatsApp + SMS. Falls back automatically if one channel fails.

9. Automation Engine

13 scheduled rules. Reminders, alerts, digests — all sent automatically.

10. AI Assistant

Natural language chat. Ask "Who hasn't checked in?" or "What's today's duty?" and get instant answers.

11. Global Search

Press Ctrl+K, search any feature, navigate instantly. Like Spotlight for your school.

12. Notifications Hub

Full history of all notifications. Who was notified, when, and whether they received it.

Why This Matters for Investors

Metric	Detail
Market Size	21,000+ secondary schools in Nigeria alone. 115 Federal Unity Colleges, 6,000+ state schools, 15,000+ private schools.
Annual Potential	NGN 9B+ at NGN 600K/school/year. Pan-African expansion adds NGN 18B+.
Competition Gap	No competitor offers school operations management + academic scheduling + communications + AI in one platform. Existing players only do grades/transcripts.
Proven Traction	Live in production since early 2026. 80+ daily active staff users. 3,000+ students tracked. All 12 modules operational.
Lowest Cost	Serverless infrastructure (Vercel + Supabase). Telegram is free. Hosting costs near zero even at scale.
Built by Users	Developed at an actual school, by the people who use it daily. Every feature solves a real problem.

Revenue Model

Tier	What's Included	Annual Fee
Essential	Attendance + Duty Roster + Reports	NGN 350,000
Professional	All modules + AI Timetable + Telegram + Automation	NGN 600,000
Enterprise	All modules + WhatsApp/SMS + Dedicated Support	NGN 1,200,000

Plus: NGN 250K setup fee per school, 15% annual maintenance, hardware bundles, SMS credits, and data analytics for education boards.

5-Year Financial Outlook

	Year 1	Year 2	Year 3	Year 5
--	--------	--------	--------	--------

Schools Deployed	10	35	80	200
Gross Revenue	NGN 10M	NGN 30.75M	NGN 63.25M	NGN 123.75M
Net Profit	NGN 2M	NGN 15.75M	NGN 38.25M	NGN 83.75M
Margin	20%	51%	60%	68%

The Investment Ask

Amount: NGN 50,000,000 (~\$32,000 USD)

Structure: Seed Round — 15% Equity

What You Get: Multi-tenancy so any school can use it, mobile apps, sales team to deploy to 100+ schools in 24 months

Your Return: Path to NGN 120M ARR by Year 5 with 68% margins. Scalable to NGN 1B+ across Africa.

How the Money Is Used

Category	%	Amount	What It Pays For
Product Development	40%	NGN 20M	Multi-school version, mobile apps, analytics dashboard
Sales & Marketing	30%	NGN 15M	Sales team, school visits, demo events, marketing
Operations & Support	20%	NGN 10M	24/7 support, deployment engineers, training materials
Infrastructure	10%	NGN 5M	Cloud costs, security audit, compliance

Why Now Is the Right Time

- **Product is ready** — All 12 modules live and working. Not a PowerPoint, not a prototype. A real product used by real people every day.
- **Market is growing** — Nigerian edtech projected to reach \$3.1B by 2028. Government actively pushing digital transformation.
- **Zero barrier to entry for schools** — 85%+ of teachers already use Telegram/WhatsApp. No app installation. Works on basic phones.
- **First mover advantage** — No one else offers this full stack for African schools. We have 18+ months head start.
- **Scalable architecture** — Built on Vercel + Supabase. Can go from 50 users to 50,000 without re-architecting.

- **Government support** — AFCS commands across 6 geo-political zones as a natural expansion path.

What Happens After Investment

Timeline	Milestone
Q3 2026	Multi-school version + Mobile app for staff
Q4 2026	Parent portal (absence alerts, report cards) + E-exam platform
Q1 2027	Asset management + AI welfare/counselling alerts
Q2 2027	Pilot at 10 schools across 3 geo-political zones
Q3 2027	Business intelligence for education boards
Q4 2027	Expand to Ghana, Kenya, South Africa
